

BECKMEN LAW

PRACTICE AREAS

ENERGY

Through our integrated transactional, regulatory, policy and dispute resolution practices, we provide legal counsel to exploration and production companies; pipelines; producers; oil and gas processors; oil field service companies; landowners; trading and marketing companies; and major financial players in the energy industry, including equity investors and lenders.

FINANCE AND SECURITIES REGULATION

Understanding the maze of security laws, we evaluate situations and advise our clients about disclosure requirements for corporations which issue publicly-traded securities, and then assist with ongoing regulatory compliance. By analyzing market opportunities, we design strategies to achieve our client's goals.

TRUSTS AND ESTATE PLANNING

Our Trusts & Estates attorneys counsel clients on developing, implementing and administering comprehensive lifetime and testamentary estate plans that carefully balance personal and tax objectives.

TAX COMPLIANCE, PLANNING, AND RESOLUTION

Because any business transaction can have adverse tax consequences if it is not properly structured, our tax lawyers bring sound financial know-how to the planning of asset-based financings, mergers and acquisitions, asset purchases and sales.

MERGERS AND ACQUISITIONS

Properly structured M&A deals help small companies become big and help big companies expand their competitive strengths. Beckmen Law works to add value in any transaction by serving as strategic business advisors, helping to evaluate risks and rewards.

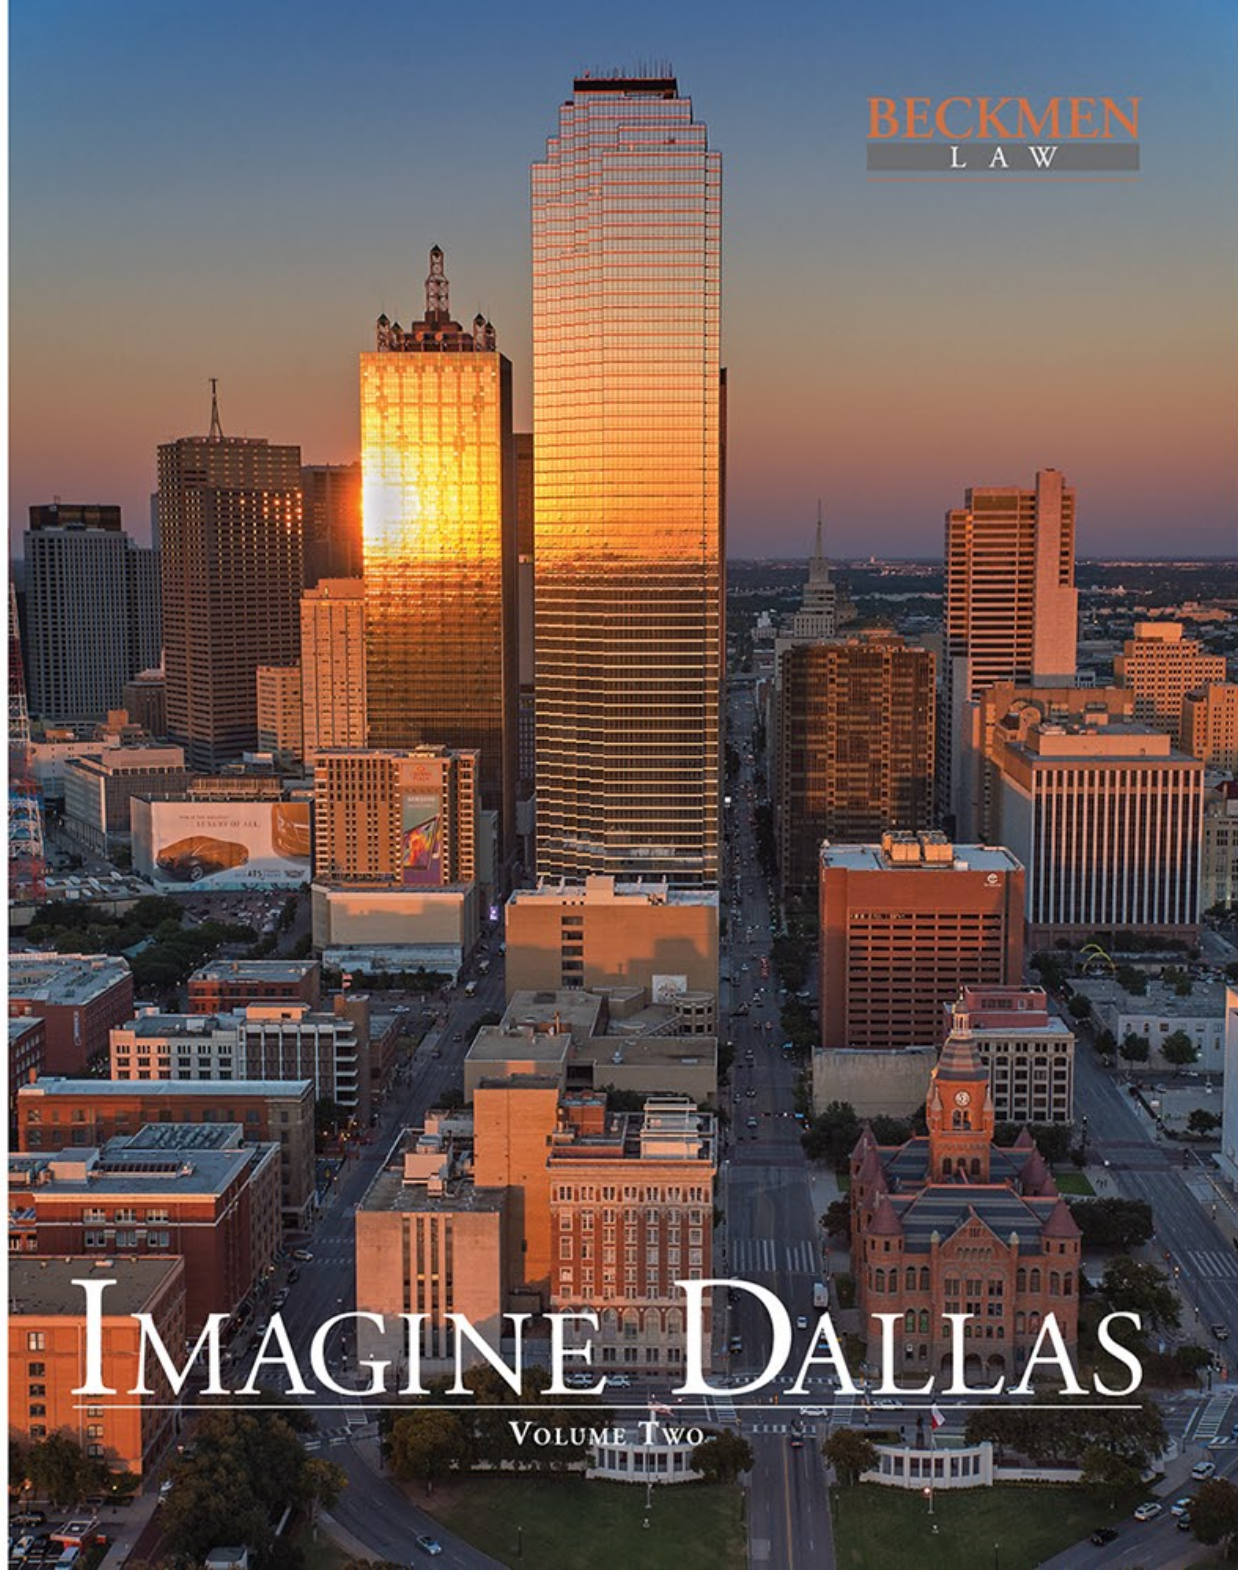

MEDIATION

Our attorneys are qualified mediators who assist parties and their counsel as neutral, third-party experts and facilitate settlements outside of a courtroom, avoiding lengthy and costly trials.
